## Annual Report on the Health of Thornton Cleveleys For the Year 1954

Medical Officer of Health:

A. H. PENISTAN,

M.B., B.S. (Lond.), M.R.C.S. (Eng.), L.R.C.P. (Lond.),

F.Soc. M.O.H.

Chief Sanitary Inspector and Cleansing Officer:

A. E. BARNES,

M.R.S.I., M.S.I.A., A.M.I.P.C.,

Certified Meat and Food Inspector

## Thornton Cleveleys Urban District Council

### HEALTH COMMITTEE, 1954

Chairman: Councillor F. R. CAVE.

Vice-Chairman: Councillor H. BARLOW

Councillor E. BUCKLEY, F.C.A.

Councillor T. F. EATON, F.C.I.S.

Councillor R. FITTON

Councillor D. M. HIND, B.Sc., A.M.I.E.E.

Councillor Miss E. PORTER

Councillor A. L. SIMPSON

### Chairman of the Council:

Councillor R. WARDLE, J.P.

### PUBLIC HEALTH OFFICERS

### Medical Officer of Health:

ARTHUR HENRY PENISTAN, M.B., B.S.(Lond.), M.R.C.S.(Eng.), L.R.C.P.(Lond.), F.Soc.M.O.H.

### Chief Sanitary Inspector and Cleansing Officer:

ARTHUR EDWARD BARNES, M.R.S.I., M.S.I.A., A.M.I.P.C. (Certified Meat and Food Inspector)

### STAFF

### Technical:

Temporary Technical Assistant:

### KENNETH E. EMERY

### Clerical:

 Chief Clerk
 ....
 ....
 Miss S. A. SIMCOCK

 Clerk
 ....
 ....
 Miss T. P. HALSTEAD

### QUALIFICATIONS AND DUTIES OF CHIEF SANITARY INSPECTOR.

### Qualifications:

- 1. Sanitary Inspector's Certificate, Royal Sanitary Institute and Sanitary Inspectors' Joint Board.
- 2. MEAT AND FOOD INSPECTOR'S CERTIFICATE, Royal Sanitary
  Institute.
- 3. Institute of Public Cleansing Certificate.

### Duties:

All duties defined in the Sanitary Officers' (Outside London) Regulations, which are applicable to an Urban District, and

- 1. Administration of Rag Flock and Other Filling Materials
  Act.
- 2. Administration of Pet Animals Act.
- 3. Administration of Dealers in Old Metal Act.
- 4. Authorised Officer, Heating Appliances (Fire Guards) Act, 1952.
- 5. Investigations, Watercourse and River Pollution.
- 6. Civil Defence, Part-time Civil Defence Instructor.

### Technical Assistant:

QUALIFICATIONS: National Certificate in Building.

DUTIES: General Assistant to the Chief Sanitary

Inspector.

The Health Committee of the Council are concerned directly with the administration of the above-named duties, and the Highways and Sewerage Committee of the Council control the cleansing of streets and the sewerage system in the district.

### Thornton Cleveleys Urban District Council

### MEDICAL OFFICER'S REPORT

Council Offices,

Thornton Cleveleys.

To the Chairman and Members of the Thornton Cleveleys Urban District Council

LADY AND GENTLEMEN,

In submitting my report on the health of the district for the year 1954, I have pleasure in stating that the public health has been very satisfactory.

The incidence of infectious disease was light. A moderate outbreak of measles occurred, but was relatively mild, and no cases were removed to hospital.

During the year only five cases of suspected food poisoning were notified, compared with 60 in the previous year. For this good result I think thanks are due to our food purveyors and caterers for their care in preparing and storing food.

I wish to record my warm appreciation of the devoted service of the Chief Sanitary Inspector, Mr. A. E. Barnes, and all the members of the staff of the Health Department, at all times.

I have the honour to be, Lady and Gentlemen,

Your obedient Servant,

A. H. PENISTAN.

### LOCAL ACTS IN FORCE IN THE DISTRICT DEALING WITH SANITARY ADMINISTRATION

Thornton Urban District Council Act, 31st July, 1923. Thornton Cleveleys Improvement Act, 31st July, 1936. Lancashire County Council (General Powers) Act, 1951.

### **BYE-LAWS**

New Streets and Buildings	1926 and 1937
Building Bye-laws (Public Health Act, 1936)	1954
Pleasure Grounds	1938
Bye-laws under Section 15, Food and Drugs Act, 1938	1950
Bye-laws under Section 81, Public Health Act, 1936	1951

### PHYSICAL FEATURES AND GENERAL CHARACTER OF THE DISTRICT

By the Lancashire (Central and Western Areas) Review Order, 1934, a part of the Township of Carleton, containing 354 acres, was added to the Urban District on the 1st April, 1934. The district is bounded on the west by the Irish Sea, on the east by the River Wyre, on the north by the Borough of Fleetwood, and on the south by the County Borough of Blackpool.

Consequent upon the addition of a part of Carleton to the district, the Ward boundaries were altered as from 1st April, 1934.

The Watercourses of the district flow eastward into the River Wyre.

### **GEOLOGY**

The general sub-soil of the district is clay, which is overlaid with a thick layer of alluvial deposit (blue silt), varying in thickness from four to eight feet. On top of this is a thin layer (about four inches) of peaty matter. This was found in considerable thickness in Butts Road (North Ward) and also in Fleetwood Road (South Ward). On top of this again is a layer of sandy soil or a mixture of soil and clay, varying in thickness from two-and-a-half feet to four feet. The surface covering is about six inches in thickness. From above, downwards, we get (1) surface covering, (2) mixture of soil and clay or sandy soil, (3) peat, (4) blue silt, (5) boulder clay.

### CLIMATE

The prevailing wind is a westerly sea breeze, and together with the usually mild winters, produces a temperate and very bracing climate.

### AREA AND DETAILS OF POPULATION

As previously mentioned, the area of Thornton Cleveleys was, on the 1st April, 1934, increased by the inclusion of a part of the Parish of Carleton, the total area now being given as 3,355 acres.

The average number of persons per acre is 4.5.

The district is divided into Wards, viz.:-

- North Ward.—This is the industrial area of the district, and has within its boundaries the works of the Imperial Chemical Industries Ltd. It is bounded on the north by the Borough of Fleetwood, on the west by the eastern boundary of South Ward, and on the east by the River Wyre. Its southern boundary cuts the remaining portion of the district roughly in half and forms the northern boundary of East Ward. The number of houses in North Ward is 743.
- **South Ward.**—The western boundary adjoins that of West Ward, and its eastern boundary is a building plot depth west of Fleetwood Road, which it follows throughout the district. It is flat in character and is residential, a portion of Cleveleys being within its boundaries. The number of houses in South Ward is 1.566.
- East Ward.—This is the agricultural area of the district and also includes part of the added area. Its boundaries adjoin the North and South Wards, the River Wyre and the Urban District of Poulton-le-Fylde. The number of houses in East Ward is 1,347.
- West Ward.—This ward was reduced in size on the alteration of the boundaries. Its eastern boundary is now a building plot depth east of Cleveleys Avenue. This Ward is in the Cleveleys portion of the district, a rapidly-growing seaside resort, which enjoys an increasing popularity with visitors from inland towns. It is flat in character, with a slight slope eastwards. The number of houses in West Ward is 1,647.

### SOCIAL CONDITIONS, INDUSTRIES, Etc.

During the last few years the western portion of the district has rapidly developed as a seaside holiday resort, and, with the additional amenities now provided, together with the activities of private builders, the district as a whole has greatly benefited.

The largest employers of labour within the district are the Imperial Chemical Industries Ltd., who have large chemical and plastic works on the northern boundary. There is still a large portion of the district devoted to agriculture. A large number of people are employed at the offices of the Ministry of Pensions and National Insurance, which are situated in our area.

During the period under review there has been comparatively little unemployment here.

### PART I.—VITAL STATISTICS

Population.—The population at Census 1951 was 15,437.

Registrar-General's Estimate, mid-1954	15,290
Number of Inhabited Houses as at 31st December, 1954	5,303
Average Number of Persons per House	2.8

### BIRTHS

During the year 139 births were recorded by the Registrar-General, comprising 61 males and 78 females.

Birth rate for district (adjusted): 11·1 per 1,000, as against 12·5 for 1953.

Still births: 28 per 1,000 (Live and Still) births.

### **DEATHS**

Based on a population of 15,290, the Registrar-General gives the Death Rate (adjusted) as 12·4, as against 10·2 for 1953.

The allocation to the various Wards of the district (after excluding transferable deaths and including local residents dying outside the district), is as follows:

	Ward	Males		Females		Total
North		 24		20		44
South		 38		<b>4</b> 0		78
East		 34		30		64
West		 40		41	••••	81
		136		131		267
		===	••••		••••	

### INFANTILE MORTALITY

During the year four deaths of Infants under one year occurred.

The Infantile Mortality Rate is 29, as against 18 for 1953.

### RESPIRATORY DEATH RATE

There were three deaths from Pneumonia (all females), and 16 deaths from Bronchitis (11 males and five females).

The Respiratory Death Rate is 1.24 per 1,000 of the population, as against 1.12 for 1953.

### PULMONARY TUBERCULOSIS

There were no deaths from Pulmonary Tuberculosis. The Respiratory Tuberculosis rate is therefore Nil.

### DEATH RATE PER 1,000 OF THE POPULATION FOR:

(1)	Influenza	••••	••••		••••	0.06
(2)	Respiratory Diseases		••••			1.11
(3)	Pneumonia (all forms)			•…		0.19
(4)	Tuberculosis—Pulmonary				••••	Nil
(5)	Tuberculosis—Non-Pulmonary					Nil
(6)	Malignant Neoplasm (Cancer)					2.15

### INQUESTS AND INQUIRIES

During the year there were 26 Inquests and Inquiries on residents belonging to the district, as follows:

### North Ward.

- (1) Male, 62 years. Cerebral Thrombosis.
- (2) Female, 42 years. Pulmonary embolism due to fibroid uteri.
- (3) Female, 61 years. Suicide—coal gas poisoning.
- (4) Female, 77 years. Cerebral hæmorrhage due to atheroma.

### South Ward.

- (5) Female, 61 years. Syncope due to ruptured dissecting aneurysm of the aorta.
- (6) Male, 78 years. Ruptured aneurysm of the aorta.
- (7) Male, 54 years. Right coronary occlusion due to coronary sclerosis.
- (8) Female, 64 years. Accidental—shock due to fracture of neck or right femur sustained through falling.

### East Ward.

- (9) Female, 63 years. Myocardial degeneration.
- (10) Female, 81 years. Misadventure—toxæmia due to fracture of right femur, sustained through falling.
- (11) Male, 44 years. Misadventure—toxæmia due to acute fibrinous peritonitis due to an operation.
- (12) Male, 59 years. Congestive heart failure.
  (13) Male, 56 years. Coronary thrombosis.
- (14) Female, 31 years. Misadventure—Banti's disease.

### West Ward.

- (15) Female, 59 years. Myocarditis due to coronary occlusion due to arteriosclerosis.
- (16) Male, 47 years. Heart failure due to coronary artery degeneration.
- (17) Female, 70 years. Pulmonary ædema due to myocardial degeneration.
- (18) Male, 46 years. Coronary thrombosis.(19) Female, 51 years. Cerebral hæmorrhage.
- (20) Female, 85 years. Heart failure due to myocardial degeneration.
- (21) Male, 67 years. Syncope due to fatty degeneration of heart.
- (22) Male, 52 years. Coronary infarction right coronary occlusion
- (23) Female, 51 years. Suicide—asphyxia due to coal gas poisoning.
- (24) Male, 34 years. Misadventure—cycle accident.
- (25) Male, 67 years. Cardiae syncope.
- (26) Female, 74 years. Misadventure—congestive cardiac failure due to shock of operation.

### BACTERIOLOGICAL EXAMINATIONS

These are carried out at the Public Health Laboratories, at Manchester and Blackpool.

Examination of sputum for the tubercle bacillus is carried out at the Elswick Sanatorium.

### Summary of Nursing Arrangements

### Hospitals and other Institutions available for the District Nursing, Professional Nursing in the Home.

(a) In July, 1923, through the Thornton Cleveleys District Nursing Association, which is affiliated to the Queen Victoria Jubilee Institution of Nurses, the district was provided with a Nurse or Nurses, as occasion required. The services have given entire satisfaction and are a boon to the district.

Number of cases visited during the year .... 269

Number of visits made during the year .... 5,907

(b) For Infectious Diseases. No action has been required, but a Nurse will be engaged if necessary.

### MATERNITY AND CHILD WELFARE

The following services are administered by the Health Committee of the Lancashire County Council and the information has been obtained from the Divisional Medical Officer of Health.

Clinics and Treatment.—One clinic is situated in the district. Tuberculosis is dealt with by the County Tuberculosis Officer on notification. Venereal disease cases attend the Blackpool Centres at Victoria Hospital, Blackpool, and Fleetwood Hospital.

Nursing Homes.—There are three within the district.

Hospital.—None in the district. Cases are sent to Blackpool, Fleetwood, Preston, Manchester, etc. Ambulance facilities are good, and hospital facilities for Infectious Disease are satisfactory. The district is provided with hospital accommodation for smallpox at Elswick; infectious disease at Blackpool Isolation Hospital; sanatorium treatment at Elswick, Grange, High Carley and other centres.

### CHIEF SANITARY INSPECTOR'S REPORT

Council Offices,
Thornton Cleveleys.

### To the Chairman and Members of the Thornton Cleveleys Urban District Council

LADY AND GENTLEMEN,

I have the honour to present the Annual Report on the work of the Sanitary and Cleansing Department of the Council for the year 1954. This has been prepared in collaboration with the Medical Officer of Health, thus repetition has been avoided.

The work of the Department has proceeded in a satisfactory manner, and day-to-day attention has been given to improvements in living conditions; the eradication of nuisances and all matters necessary to the health and well-being of our community.

Every endeavour is being made to improve premises where food is prepared and sold and during the year improvements were carried out to bakehouse premises.

The Cleansing Service has carried on satisfactorily, and a weekly collection of refuse and salvage was maintained throughout the period. Over 230 tons of wastepaper was sold during the year, an increase of nine tons over the previous year. Due to rising costs, provision of an electrical baling press and adaptation of a refuse disposal site, the cost of this service shows a fairly large increase over the previous year.

The Housing position, though improved, is still difficult, and some people are still waiting for houses. The true position of overcrowding in the district is not known, but some does exist.

Due to the exceptionally heavy rainfall in the area, some surcharging of sewers was experienced.

I desire to pay a sincere tribute to the members of the Council and the Health Committee for their help and ever-ready co-operation in all matters affecting the sanitary conditions of our district.

I especially thank the members of my staff for their helpful and loyal co-operation during the year.

I am, Lady and Gentlemen,

Your obedient Servant,

ARTHUR E. BARNES.

### SANITARY CIRCUMSTANCES IN THE AREA

### WATER SUPPLY

The district is supplied by the Fylde Water Board, the water being of good quality, pleasantly soft and of a peaty nature. Only one outlying house depends on well water.

Eight samples of water were obtained from the mains supply. Four were submitted for bacteriological examination and four for chemical analysis. All samples were satisfactory.

The water supply has been satisfactory in quality and quantity throughout the year.

### **Statistics**

Total number of houses supplied by the Fylde Water Board Total number of houses dependent upon well water	5,302 1
	5,303

The only house in the district dependent upon well water is remote from any mains supply, and it would be impossible, except at exorbitant cost, to have it connected to the mains supply.

### DRAINAGE AND SEWERAGE

Owing to the flat nature of the district, a system of electrical pumps and ejectors worked by compressed air is in operation. The sewage is discharged near dead low water mark into the Irish Sea. No extensive additions were made to the sewers during the year, but additions were made to drain the Council's housing estate.

### **Statistics**

	water carriage system	 	 	5,277
Dwelling houses using		 	 	
Dwelling houses using	privy middens	 	 	1
Dwelling houses using	pail closets	 	 	25
				5,303

### Conversions during the year

Number of pail closets:					
To fresh water closets	•	•	 ••••	 	1

It will not be possible for further conversions to take place until the sewers are extended. The 26 premises without modern sanitary accommodation are farms or outlying cottages and to which no sewers are available. There is still one privy midden which has not yet been converted to a pail closet.

### DRAINAGE

There are some premises in the district which are not connected to the Council's sewers, but which have septic tanks and filters, some of which discharge to adjacent watercourses. Some of these are not satisfactory but are mostly in districts where no sewers are available.

Due to the heavy rainfall during the year, flooding and surcharging of the sewers was experienced in some parts of the district. Some attention is required to prevent surcharging of the sewers in part of the Cleveleys district.

A district such as ours, due to its natural amenities, is bound to develop, and the utmost care should be taken, where practicable, to see that development takes place where sewers are available. It is most desirable that any new developments in this area should have proper drainage facilities connected to the Council's sewers, although it is appreciated that this cannot always be insisted upon.

The Council had previously agreed to extend a portion of the sewer in one part of the Thornton area, but this work had not been carried out at the end of the year. The provision of a sewer in the Briar Road area is receiving the attention of the Council.

### Improvements obtained as a result of action by the department

1.	New drainage systems laid to piggeries	 3
2.	Re-laying of drain with backfall	 1
3.	New drainage system to Church premises and connection to sewer	 1
4.	Additions to drainage system to café premises	 1
5.	Renewal of defective rest bends and pipes	 2

The department employs a man part-time on drainage work, the cost of clearing and cleansing the blocked drains being borne by the owner or occupier. This service to the public is much appreciated and also helps in the efficient working of the department. Preparation and service of notices are thus avoided, unless the blockage is due to structural defect of the drains.

### **Statistics**

Improvements, etc., made to Piggeries during 1954	
Provision of midden steads	3
Extension of piggeries	

Provision of proper drainage systems

### PUBLIC CLEANSING

The work of the Public Cleansing Section of the Department has proceeded in a satisfactory manner. The collection of household refuse and salvage is carried out by a 16 cu. yd. S.D. (Newcastle type) side-loading freighter, with a cab to accommodate driver and four loaders; and a "W" type S.D. 16 cu. yd. side-loading freighter, also with a cab to accommodate driver and four loaders. A special weekly collection of wastepaper salvage from shop and business premises is carried out by one 11 cu. yd. S.D. freighter.

Throughout the year, a weekly collection of refuse and salvage from all premises in the district was maintained. This is essential if we are to maintain or increase our salvage collection.

### Costings—Refuse Collection (Year ending 31st March, 1955)

### DISPOSAL OF REFUSE

The Council own a plot of land approximately 9 acres in extent for the purpose of refuse disposal and at the end of the year it was estimated that  $3\frac{1}{2}$  to 4 acres were still available. On our present yield, this land will give us disposal facilities for a period of approximately two to three years. We use nearly  $1\frac{1}{2}$  acres per year on our present depth of tipping.

The Council, at the end of the year, started a "pilot" land reclamation scheme near the River Wyre on the easterly side of the district, and there is every indication that such a scheme will be successful. When the "pilot" scheme is finished during 1955, the Council will then be in a position to judge whether or not a larger scheme would be practicable.

### Costings—Refuse Disposal (Year ending 31st March, 1955)

Number of loads							1,93	6
Estimated weight (tons)	• • • • •	•		• • • • •	••••		4,84	0

Cost per ton				••••	•		5s. 0d	l.
Cost per 1,000 houses per	ann	um		••••	• • • •	•	£22	5
Cost per 1,000 population	per	annum			••••		£7	9

### Costings-Refuse Collection and Disposal

				£
Total cost	 	••••	•	 8,428
Cost per 1,000 houses per annum	 		••••	 1,576
Cost per 1,000 population per annum	 			 551

It will be noticed that the costs for collection and disposal of refuse and salvage show a fairly large increase over the previous year. The small profit from salvage is due to the fact that during the year we purchased an electrical baling press, and also had an electrical main laid to the Paper Depot, and the premises wired.

The disposal costs are high due to the adaptation of the site at the River Wyre Foreshore for a "pilot" scheme. In addition, there were increases in running costs and materials.

### COLLECTION AND DISPOSAL OF SALVAGE

The Council continued with the collection of waste paper and other salvage, and during the year we experienced little difficulty in disposing of it. The price received for the sale of baled waste paper rose slowly during the year, and at the 31st December, 1954, we were receiving £7 0s. 0d. per ton. It is pleasing to report that the tonnage of salvage collected exceeded that of the previous year by over 40 tons, this increase being accounted for mainly by waste paper (9 tons) and tins (38 tons). An increase in the amount per ton received by us for waste paper would no doubt stimulate more intensive collection and separation. During the 14 years ending 31st December, 1954, over 2,422 tons of salvage have been disposed of, for a sum of £16,334: a yearly average over the period of 173 tons collected, and average income of £1,166.

Thanks are again due to all the workmen engaged on refuse and salvage collection and disposal, for the co-operation they have given during the year.

Paper Balers		••••	 	2
Tip Man			 	1

Total: 17

Owing to holidays and sickness, the number of employees shown was not always available throughout the year, but shows the present minimum requirements of the department. During the past 10 years the number of houses has increased by nearly 800, and this figure is still increasing. The number of loads of refuse collected, the estimated weight collected, the visits to premises and vehicle mileage, have all increased over the previous year. The time is fast approaching when consideration will have to be given to the employment of additional labour. Not an unimportant factor is that many men employed on refuse collection are growing older, and the type of work is no less heavy or arduous than in the past.

### MONTHLY ANALYSIS OF REFUSE COLLECTION AND DISPOSAL

### PUBLIC HEALTH ACT, 1936—HOUSING ACTS, 1936-49 Details of Statutory Notices Served

Act and Section Reason for Notices No. of Notices complied served with by end of year

Housing Act. 1936 ... Housing defects ... 5 ... 4

Section 9

### SMOKE ABATEMENT

Some complaints have been received during the year regarding alleged smoke nuisance, and these were investigated by the department. Appropriate action was taken where necessary.

### **OFFICES**

Offices in the area are, for the most part, of a modern character and mostly comply with the requirements of the Public Health Act, 1936.

### SWIMMING BATHS AND POOLS

There are no public or privately-owned baths or pools in the area which are open to the public.

### OFFENSIVE TRADES

There are 13 in number, and are confined exclusively to fish friers. Regular inspections are made, and conditions are generally found to be satisfactory. Fifteen inspections were made during the year.

### RAG FLOCK AND OTHER FILLING MATERIALS ACT, 1951

No premises in the area are licensed for the manufacture of rag flock or other filling materials. There are three premises on the register where filling materials are used.

### PET ANIMALS ACT, 1951

One pet shop was on the register at the end of the year. Inspections have been carried out and the premises appear to be conducted in a proper manner, the provisions of the Act being complied with.

### PUBLIC HEALTH AMENDMENT ACT, 1907—Section 86 Dealers in Old Metal and Marine Store Dealers

The provisions of the above Section are now in operation, and one certificate has been issued in respect of premises in the Thornton area.

### SHOPS ACT, 1950

A survey of shops was carried out twice during the year, and for this purpose 691 inspections were made. Shops coming within the scope of the Factories Act have been included in the following list, the record of inspections being included under Factories.

### MOVEABLE DWELLINGS AND CAMPING SITES

The control of moveable dwellings and camping sites in this area is under the Thornton Cleveleys Improvement Act, 1936, and not the Public Health Act, 1936.

We have no licensed sites, but the three in use are approved by the Council, and comply with their requirements. They are permitted to be used for the following number of caravans:

 No. 1 Site
 ....
 206 caravans.

 No. 2 Site
 ....
 40 caravans.

 No. 3 Site
 ....
 30 caravans.

Each site has been conducted in a satisfactory manner, and there has been no cause for serious complaint from a sanitary point of view.

It has been found upon investigation that some caravans are being used for permanent habitation. It is not the intention of the Council that they should be so used, but for holiday purposes only. When the housing position improves, it is intended that this practice shall cease.

### VERMINOUS PREMISES

Several complaints received during the year were thoroughly investigated, advice and help being given.

Eradication of bed bugs is carried out by private contractors using hydrogen cyanide gas. Minor and new infestations are carried out by the department in co-operation with the tenants or owners concerned.

### Particulars of Complaints Received and Eradications carried out

Silver Fish					Complaints received Eradications

Wasps	••••	***	••••		Complaints received Eradications	4

### RODENT CONTROL

During the year the test-baiting of the foul sewers was carried out and for that purpose 184 inspection chambers were used. In each case no take was observed. An exemption certificate was received from the Divisional Rodent Officer, Ministry of Agriculture and Fisheries for the year ending 31st March, 1955.

The charges for treatment are as follows:

plus cost of bait.

### Statistics for year 1954 (1st Jan.—31st Dec.)

Number of complaints received	<b></b>	•	89
Number of infestations			75
Number of visits for purposes of eradication			699
Number of premises successfully treated by L.	.A		67
Number of visits made—search and survey			551

### PREVENTION OF DAMAGE BY PESTS ACT, 1949

It was not found necessary to serve any Statutory Notices under the provisions of the above Act. A few intimation notices were served and these were usually sufficient to secure the co-operation of the people concerned.

We experienced no difficulty with regard to the operation of the Act.

### Statistics for 12 months ended 31st March, 1955

	Local Authority	Dwelling Houses	Agri- cultural	All other (including business premises)	Total

### DISINFECTION

Disinfection is carried out by means of a formalin spray or by means of formalin fumigators. A Thresh steam disinfector was installed in the Council's Depot in 1925.

Disinfection is carried out on request in houses where deaths have occurred from cancer, and in all cases where deaths have occurred from pulmonary tuberculosis.

### **SCHOOLS**

The general condition of the schools in this area can be considered satisfactory, each being supplied with Fylde water and in each case modern water closets are provided.

The six schools (excluding private schools) are under the control of the Lancashire Education Committee and are inspected as required.

### DESTRUCTION OF DOMESTIC PETS

The modern electrical chamber for the destruction of unwanted dogs and cats is in constant use and has been greatly appreciated by the public. For a charge of 1/-, any person can have a dog or cat painlessly destroyed. The department undertakes the proper disposal of the carcases.

Number of dogs destroyed in 1954 Number of cats destroyed in 1954		 		61 79

### MARKETS

The only markets in the district are privately owned and have been regularly inspected throughout the year.

### SHELL FISH

There are no shell fish beds in our area.

### MORTUARY

A modern mortuary, possessing equipment in accordance with present-day practice, has been in use throughout the year. It was used on 15 occasions, and 13 post-mortems were conducted by the Police Surgeon.

### FACTORIES ACT, 1937

Registers are kept of all premises coming within the scope of the Factorics Act and regular and frequent inspections are made.

Particulars of inspection, defects, contraventions found and remedied, are enumerated in the following tables. There are no underground bakehouses in the district.

### 1. Inspection of Factories and other Premises

Premises	Inspections	Number on Register	Written Notices
Factories (without mechanical power)	87	40	-
Factories (with mechanical power)	155	108	_

(d)	Any	other action taken under the Act	0	0

### INSPECTION AND SUPERVISION OF FOOD

### MILK SUPPLY

At the end of the year there were three dairies on the register. The dairy previously reported as sub-standard has now closed down, and one new dairy has been opened.

Regular inspections are made and particular attention is paid to the cleanliness of the premises, utensils and all articles coming into contact with the milk. The bulk of the milk is supplied by large dairies from outside the district and regular samples are taken.

### Particulars of Distributors of Milk operating in the District

### FOOD AND DRUGS ACT, 1938

During the year 8 samples of milk were taken by the County Sanitary Officer for analysis under the above Act. All were satisfactory.

### MILK AND DAIRIES REGULATIONS, 1949—REGULATION 20

No action was found necessary under the above Regulations.

### INSPECTION AND SUPERVISION OF MEAT AND OTHER FOODS

There are no licensed slaughterhouses in the area, but visits to retail shop premises were paid at frequent intervals. All food preparation premises are regularly inspected at least once a quarter, and for that purpose 442 inspections were carried out (bakehouses, restaurants, cafe kitchens, unsound foodstuffs, fish friers' premises, butchers' shops, ice cream premises, food preparation premises).

### CARCASES INSPECTED AND CONDEMNED

The following are the particulars of animals killed in this area.

	Cattle excluding cows	Cows	Calves	Sheep and Lambs	Pigs
Number killed (if known)	_		_	_	15
Number inspected	-	-	-	-	15
All Diseases except Tuberculosis Whole carcases condemned	_		_

spected affected with Tuber-					
culosis	- 1	<b>—</b>	_	_	-

### CLEAN FOOD CAMPAIGNS

All food premises are regularly inspected and co-operation between food traders and the department is good.

### BAKEHOUSES

During the year a review of all bakehouses was undertaken, with a view to bringing the premises up to reasonable standards. In co-operation with the owners and occupiers, many permanent improvements were made to the premises, which will make for easier working and improved hygienic standards.

The work requested had been completed at 17 of the bakehouses by the end of the year, and some work had been done at five, no work being done or commenced at three.

### Work carried out at Bakehouses

Floors repaired or renewed		3
Wooden floors covered		3
Walls cement rendered and repaired		11
Disused apertures bricked up or re-construction of part bakehouse		5
Ceilings underdrawn		2
Decorations carried out		8
Wooden benches covered with impervious material		11
Defective equipment renewed		1
Sinks replaced and additional sinks and wash-basins provided.		9
Hot water geysers for staff		3
Headgear provided for staff		11
Receptacles provided for refuse		1
Storage of coke inside bakehouse discontinued		1
Plastic Savoy bags provided	****,	7
Domestic appliances removed from bakehouse		2
Alterations to sink waste pipe discharge		1

### UNSOUND FOODSTUFFS

It was found necessary, after examination and tests, to accept the voluntary surrender of the following foodstuffs:

				<del></del>	$\frac{}{2}$	3		4	110	<u>-</u>
				=		=		= =	110	$\frac{5\frac{1}{2}}{}$

### METHOD OF DISPOSAL OF CONDEMNED FOODS

If possible, any condemned foodstuffs are burned in the Council's boiler, but if this is not possible, they are disposed of by burying on the Council's refuse tip.

### ICE CREAM

During the year only one factory was manufacturing ice cream (heat treated), although 3 premises are registered for this purpose. The premises generally are of a satisfactory standard and possess the necessary modern equipment, including steam sterilisation plants. In addition, 67 dealers were on the register at the end of the year. Regular and frequent inspections were carried out at all premises, 84 inspections being made.
